

C50 | Clean Combustion & High Efficiency

Maximum safety
and versatile usage

The C50 operates with a high heating value, offering clean and easily controllable combustion. It is the perfect choice for industrial and commercial customers looking for reliable solutions in cooking, heating, and similar applications.

Industries Served:  Hospitality  Commercial

Benefits of the C50 Cylinders

Operates safely in high heating value.

Easy to handle.

Wide distribution network for quick delivery.

Regular cylinder maintenance to ensure cylinder is always clean with adherence to high safety standard for practical usage.

Types of C50 Cylinders

The C50 cylinders are among our most popular LPG gas cylinders, frequently used by hotels, factories, resorts, food courts, restaurants, and canteens. The convenient 50kg cylinder is available in different types to meet various appliance needs.

COMPACT

Suitable for low consumption usage.

Recommended for vapour gas system.

POL

Suitable for medium consumption.

Increased speed flow rates compared to Compact cylinders.

Recommended for vapour gas system.

LIQUID WITHDRAWAL

Suitable for medium-high consumption.

Utilized by converting the liquid to vapour by installing a vaporizer.

Recommended for liquid gas system.

DUAL VALVE

Flexible medium-high consumption.

Provides the functionality of both liquid withdrawal and vapour POL.

Recommended for liquid and vapour gas system.
